Subject: Is this Contiguous

Omaha Transloading is owned by the same person as Nebraska Railcar Cleaning Services. OT has no ID numbers and doesn't need them. NRCS has two numbers, NEX000511147 for the northern facility at 280 Pierce Street and NEX000511154 for the southern facility at 115 Hickory Street. To the right (east) of the southern facility, outlined in red, is GE Railcar on the OT property with its own ID number, NER000510388, with an address of 120 Hickory Street. The railroad bisects the two properties and there is no direct path between them unless you walk. To drive, one must exit the property, travel north/south on Second Street, and then enter the other facility.

I hate to admit it, but I think the determination to assign two ID numbers (a third even for GE) is correct. Can you dispute this?
